

Description:

pLKO_AS7w.eGFP.puro was derived from pLKO_AS3w.eGFP.puro by replacing CAG promoter with human PGK promoter.

Location of Features:

(other features, please refer to pLKO_AS3w.eGFP.puro)

- hPGK promoter : nt130-634
- IRES of EMCV (IRES1) : nt1382-1984
- Puromycin resistant gene : nt1982-2581

Note:

1. Stbl3 (Invitrogen) bacteria is recommended to be used for transformation.
